Professional Summary

Proactive Site Reliability Engineer (SRE) and Cloud System Administrator with over 12 years of experience managing enterprise IT operations, scalable cloud infrastructure, and endpoint security. Proven ability to transform technical challenges into business value by improving system reliability and reducing operational friction. Specialized in designing resilient cloud architectures, deploying Infrastructure as Code (Terraform), managing container orchestration (Kubernetes), and implementing robust Cybersecurity measures to build secure, highly available environments for the European and global markets.

Core Competencies & Technical Skills

Cloud & Infrastructure: AWS, Google Cloud Platform (GCP), Linux Administration, Cloud System Administration.	DevOps & SRE: Terraform (IaC), Kubernetes, Docker, CI/CD, SLIs/SLOs, Monitoring, Reliability Engineering.
Cybersecurity & IAM: Okta Identity and Access Management, MDM/DEP (Kandji/IRU), Zero Trust, Vendor Security.	Scripting & Automation: Python, Bash, PowerShell, Google AppScript, REST API Integrations.

Professional Experience

Huge — Bogota, Colombia

System Administrator / SRE (Sep 2025 – Present) | Senior IT Specialist (Apr 2022 – Sep 2025) | IT Support Specialist (Mar 2021 – Apr 2022)

- Cloud System Administration & SRE:** Architected, managed, and scaled AWS and GCP cloud solutions. Integrated Terraform for Infrastructure as Code (IaC) to standardize deployments and eliminate configuration drift.
- Containerization & Reliability:** Deployed and monitored applications using Kubernetes to ensure high availability, fault tolerance, and seamless auto-scaling across cloud environments.
- Cybersecurity & Identity:** Hardened organizational infrastructure by managing enterprise user access, RBAC, and permissions globally via Okta and enforcing Zero Trust principles.
- Endpoint Security:** Led the secure provisioning and deployment of Mac systems leveraging modern MDM and DEP frameworks (Kandji/IRU).
- Automation & Scripting:** Eliminated toil and automated repetitive IT operations using Python, Google AppScript, Bash, and PowerShell. Debugged and integrated REST APIs to orchestrate security and IT tools.

NETCOM WIRELESS S.A. — Bogota, Colombia

Application Specialist (Nov 2017 – Dec 2020)

- Security & Compliance:** Audited and verified the cybersecurity posture of third-party vendors, enforcing strict alignment with internal corporate security standards.
- Infrastructure Strategy:** Collaborated with developers to design and secure infrastructure setups, ensuring robust performance and alignment with business objectives.

- **Database Administration:** Developed, optimized, and implemented stored procedures utilizing T-SQL, significantly reducing latency and improving query execution times.

Previous Technical Roles

- **LATCOM:** *Technical Support Specialist L2* (Jun 2017 – Jul 2017). Managed escalations and configured equipment.
- **Avior Airlines C.A:** *Technical Support L2* (Feb 2016 – May 2017). Diagnosed network/equipment failures; managed remote infrastructure.
- **Soporte SPI, C.A.:** *Technical Support Analyst L2* (Dec 2013 – Jan 2016).

Education & Certifications

- **Associate's Degree in Informatics:** IUTIRLA (2007 – 2011)
- **Certifications:** Python for Data Science, AI & Development; Open Source Software Development, Linux and Git; JavaScript, jQuery, and JSON.
